The screenshot displays the 'Take A Random Quiz' interface. At the top, there are four navigation links: 'TAKE A RANDOM QUIZ' (highlighted in blue), 'CREATE A CUSTOM QUIZ', 'MY SCORES', and 'SETTINGS'. Below these links, the title 'Take A Random Quiz' is shown. Underneath the title are three radio button options: 'Consisting of random questions from the entire question pool.' (selected), 'Consisting of random questions that I need more practice with.', and 'Consisting of random questions that I have tagged for review.'. A large blue button labeled 'Start Quiz' is positioned below the options. To the right of the quiz options, there is a 'Your Readiness Score' section. It features a semi-circular gauge with a red segment indicating 15%. Below the gauge, text explains that the score reflects understanding and that a higher score indicates a stronger grasp of the content. A blue button labeled 'Learn More' is at the bottom of this section.

Your Readiness Score is an outstanding educational testing and learning option we provide you when you [sign up for our optional Study Mode exam](#). By pinpointing knowledge gaps, the score directs study efforts toward areas where you need the most support.

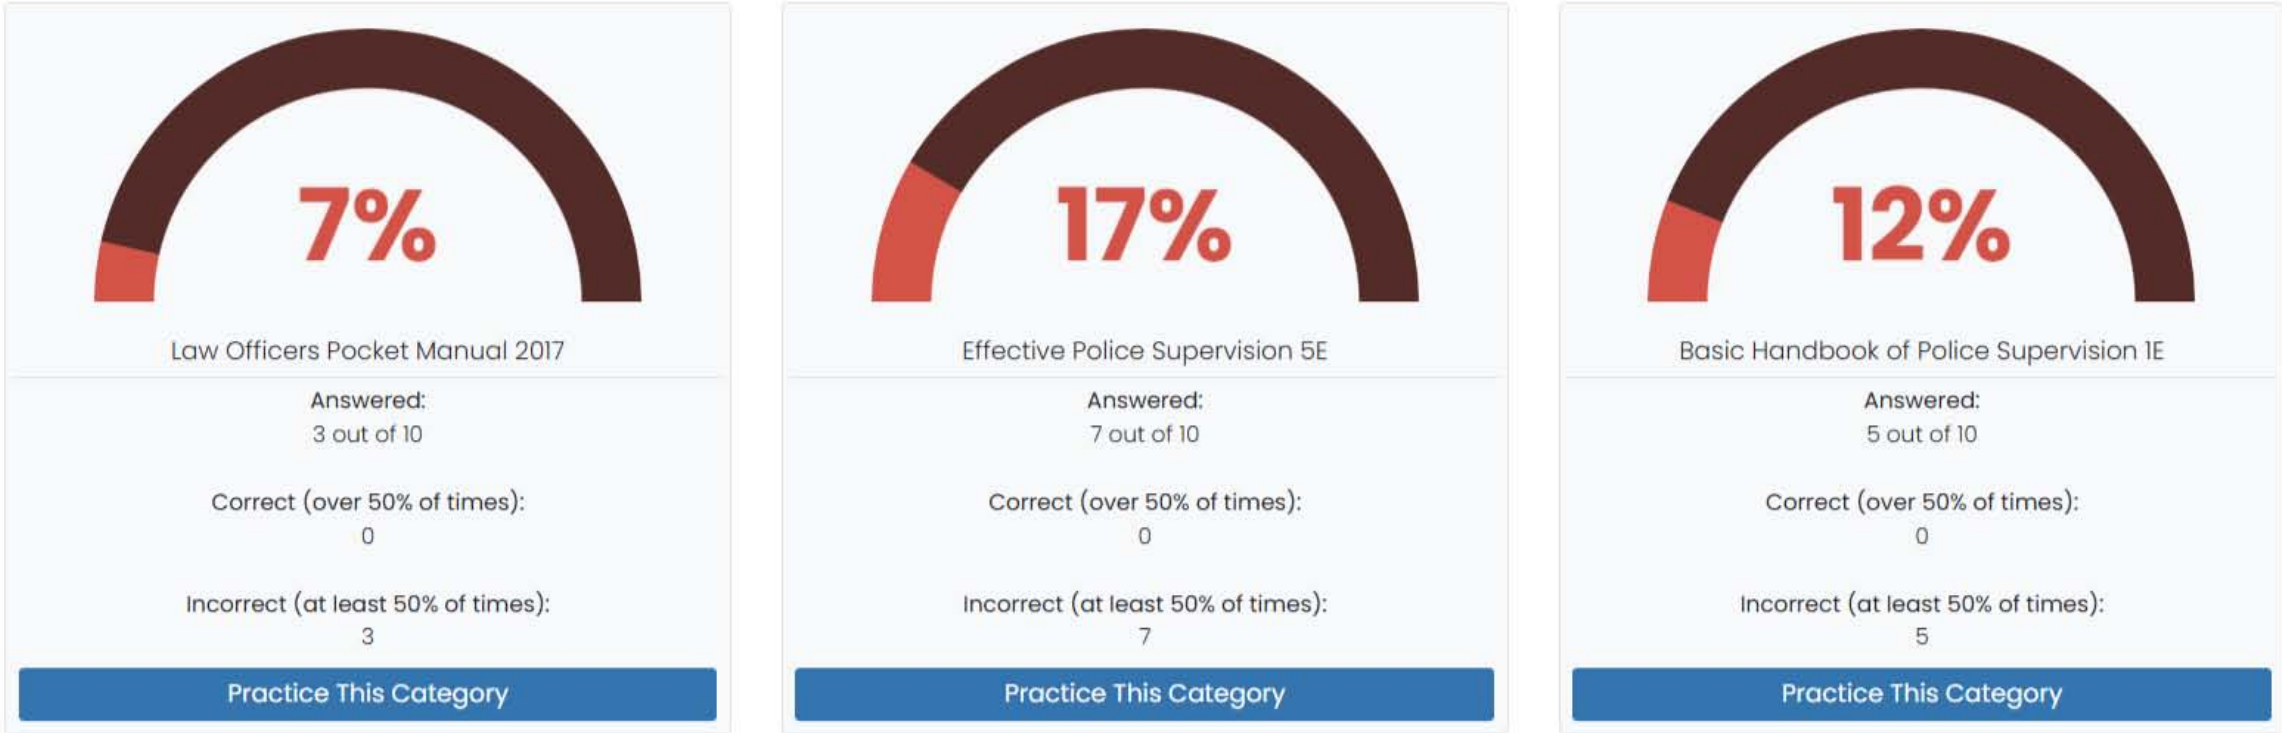

With your Readiness Score, you will **identify and concentrate on the questions, chapters and topic areas you need the most practice with**. The graphic above is the opening screen Study Mode. Here you can **choose options to take a random quiz, create a custom quiz, review your scores, and change your settings**. You can choose questions from **all the textbooks** in your account, just **certain specific textbooks**, or choose questions you **need more practice** with, or choose questions you have **Tagged for Review**.

Next, the system shows you right on the screen how many questions in your prior attempts you answered correctly, incorrectly with a breakdown for each of your textbooks. As you progress with the Study Mode you will **clearly identify the areas you need the most help with** and be able to concentrate on those questions.

These screens show material from 3 of our short, sample exams combined into the Study Mode option. **Your screens of course will show analysis of your exam activity for your specific textbooks.** Here you also will **choose which of your textbooks to include**; just 1, or questions from all or just some of the textbooks in your account.
